

Qbic BXP-300 W

- 3 years warranty
- HDMI 2.0
- Comes with VESA mounting bracket

Focus on smooth 4K content

Focus more on your content and less on installation and technical hassle. The Qbic player always comes with the latest version of Smartsign preinstalled. All you need to do is choose if you want a local installation or use our cloud service.

All screens, new and old

Older screens who lack compatibility with the current signage solutions on the market can now easily be revived with a Qbic player. A good thing for both the environment and your wallet.

Ultra Smooth 4K Resolution*

A powerful video processor handles intensive high frame rate video for smooth playback, easily connected to your 4K screens.

* 4k UHD Video playback, other content is displayed in 1920*1080.

A box with that little extra

The Qbic player supports remote access through TeamViewer which is useful for maintenance purposes. The player also supports touch screens and has built-in memory protection if something goes wrong. All in a rugged shell that can handle tough environments.
