

The Smartsign Licensing Portal

A clear view of licenses, usage, and connected screens

The new portal makes the registration process for new customers an easy to follow step by step process starting with an e-mail. It provides a clear overview of licenses and usage, and what screens the licenses are connected to. The user can also keep licenses in stock for future activation, or automatic activation on expiration.

More than one company?
Use the menu to switch.

Inventory

The inventory stores all your licences waiting to be activated. If a screen is missing a valid license, it will automatically get one from the inventory.

Active licenses

All your active licenses, with info on registration and expiration dates, and what screen the license are connected to.

Status

A summary of all your licenses, and suggestions on what you need to do if something needs your attention
